

## Lifetime Warranty

Fabrix™ provides a life-time warranty on all its products. The products are warranted against material and production defects. Fabrix remains in warranty unless damaged by unofficial installation methods, mechanical impact or unfavourable environmental factors. To learn more about our lifetime warranty, visit [www.fabrix.com/warranty](http://www.fabrix.com/warranty).

## Handling and Storage

- Fabrix™ tracks should be transported and handled with care when loading and unloading.
- The tracks should not be stacked under heavy load in case of damages.
- When possible, the tracks should avoid long exposure to sunlight due to UV degradation of the polymer.

## Cleaning of fabric

- Use a lint roller to remove surface dirt and debris.
- Spray isopropyl alcohol onto the fabric to remove tough stains.
- Use a lint-free cloth to gently massage the stain away.
- In case of extreme stains, use small amounts of thinner onto the stain. Use a lint-free cloth.
- Do not use water to clean the stain as it may cause dye diffusion.

## Liability

Please observe in general the specific characteristic of the polymer material. Damages or faults, which have an impact on the processing or are caused by an overloading of the Fabrix™, exclude claims against us.

## Complaints

All complaints are to be announced immediately after delivery and before start of installation by email.

## Further development

Technical changes as well as further developments are reserved

## Production Tolerances

Fabrix™ are produced accurately on plastic extrusion machines with tolerance of +/- 0.25 mm.
